

Green Track Sustainability Plugin User Manual

✓ Core Features

1. 🔄 Automatic Deployment Metrics

- Uses GitHub Actions with a third-party package to collect:
 - 🌡️ **Energy Consumed**
 - ⚙️ **Average CPU Utilization**
 - 🕒 **Total Duration of Deployment**
 - ⚡ **Average Power Usage**

2. 📊 Custom Sustainability Dashboard

- View interactive, animated visualizations of your deployment data.
- Metrics displayed in large, easy-to-understand cards.

3. 📄 Sprintly Confluence Report Generation

- Auto-generates a sustainability report in Confluence every time a sprint is completed.
- Includes:
 - Sprint summary
 - Developer-wise metrics
 - Aggregated team metrics
 - Accessibility checklist summary

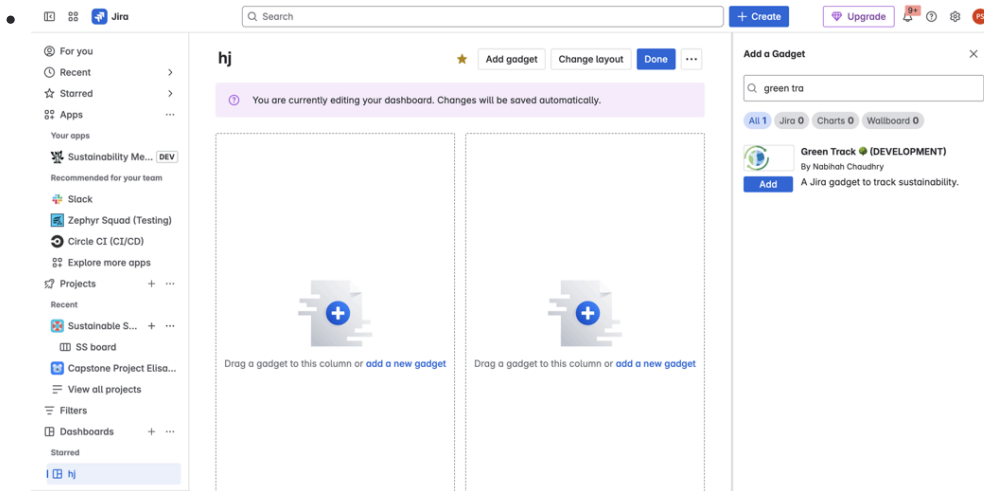

4. 📋 Accessibility Checklist Workflow

- When a developer moves a ticket to **"Done"**, an **Accessibility Checklist** (based on WCAG guidelines) appears.
- Developers must check off relevant items before submitting.
- Once submitted, the checklist becomes read-only.

🚀 How To Use It

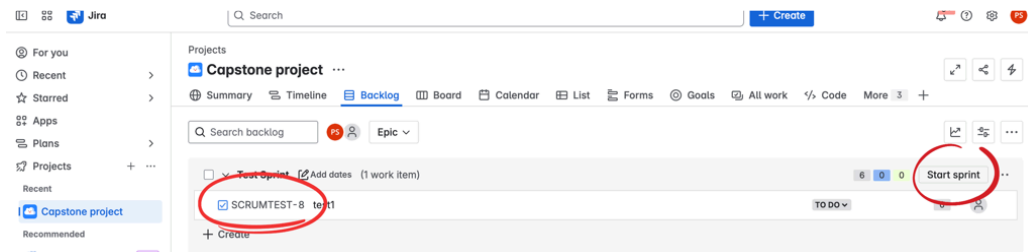

1. Install the Plugin

- Plugin should already be installed in your JIRA site.

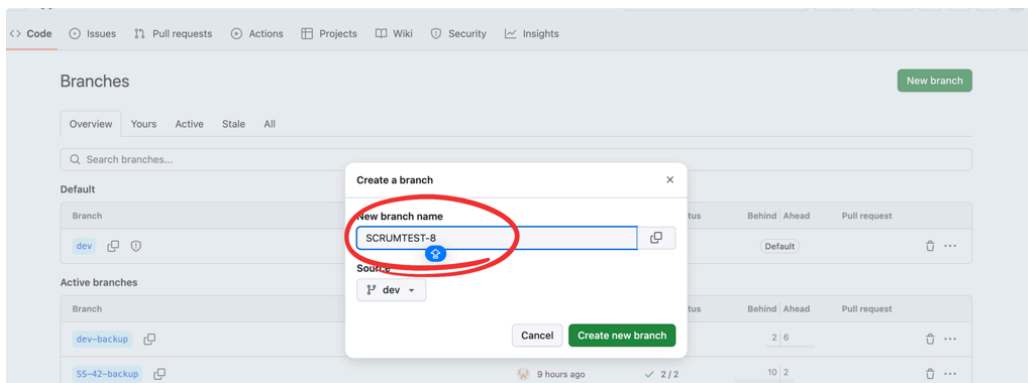

2. Create Your Tickets and Start a Sprint

- Create JIRA issues.
- Start a new sprint as usual.

3. Link Tickets with GitHub Branches

- Create GitHub branches using JIRA issue keys.
- Deploy code as usual.

4. View Deployment Metrics

- Each deployment sends metrics to the plugin backend.
- View metrics on:
 - **Dashboard (in JIRA)**
 - **Sustainability Insights Popup**

Full-Screen Sustainability Page

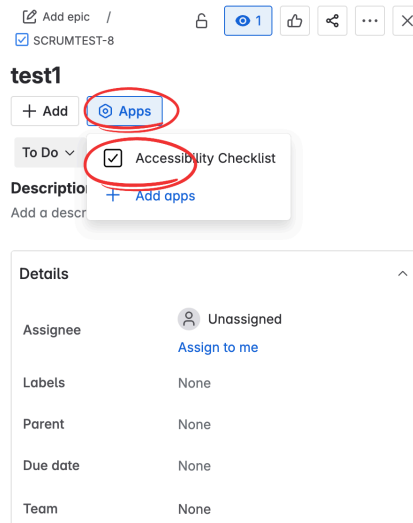

The screenshot shows the GitHub Actions interface for the 'sustainability-plugin' repository. The 'Actions' tab is selected, displaying a list of workflow runs. One run, 'SCRUMTEST-8 is running metric calculations', is highlighted. Below this, the 'Measure-Deployment' job log is visible, showing a series of steps: 'Clone Eco-CI', 'Start Measurement', 'Dummy Workload (replace with real job)', 'Get Measurement', 'Display Results', and 'Convert HTML table to enriched JSON (with metadata) & send to proxy-server'. The log also includes a table with columns for 'Run', 'Total', 'Received', 'Kferd', 'Average Speed', 'Time', 'Time Spent', 'Time Left', and 'Current'.

Go to the **Workflow file** section in here and change the below details according to the region you are in.

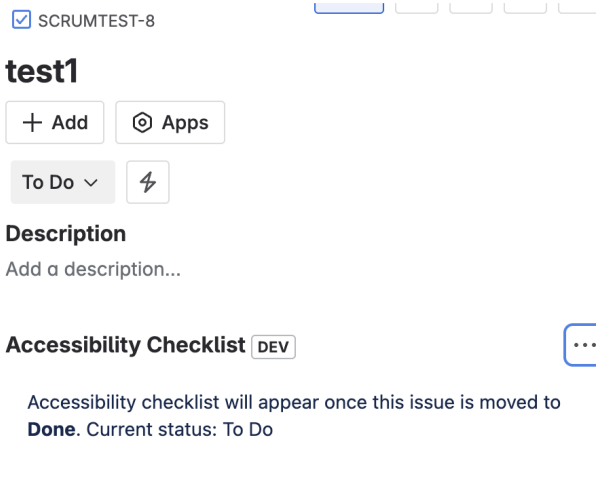

```
ECO_CI_JSON_OUTPUT: "false"
ECO_CI_GEO_CITY: "Lappeenranta"
ECO_CI_GEO_LAT: 61.0466
ECO_CI_GEO_LON: 28.0685
ECO_CI_LOCATION: "FI"
ECO_CI_FILTER_LOCATION: "FI"
ECO_CI_ZONE: "FI"
ECO_CI_CALCULATE_C02: "true"
```

5. Use the Accessibility Checklist

Inside the ticket, click on Apps and add accessibility checklist

- If the ticket is not **Done** yet:

- When a ticket is moved to **Done**:
 - The checklist appears.
 - Click "**Read All Criteria Points**" to **select all** accessibility checklist items at once.
 - You can also manually check off individual items based on what you implemented.
 - Click "**Submit Checklist**" to save your responses.
 -  The checklist is sent to the database.

Accessibility Checklist DEV

...

Accessibility Checklist

☐ **1.2.2 Captions (Prerecorded) (A)**

Essential for all videos with speech content.

☐ **1.2.4 Captions (Live) (AA)**

Important for live streams, TV broadcasts.

☐ **1.2.5 Audio Description (Prerecorded) (AA)**

Supports blind/visually impaired users.

☐ **2.4.7 Focus Visible (AA)**

Make sure focus indicators are clear (for remotes/keyboards).

☐ **2.5.8 Target Size (Minimum) (AA)**

Critical for remote control precision—buttons must be large enough.

☐ **3.3.2 Labels or Instructions (A)**

For search bars, login, subscriptions, etc.

☐ **4.1.2 Name, Role, Value (A)**

Ensure compatibility with screen readers and smart TV voice assistants.

Read all criteria points

Submit Checklist

Note: Once submitted, the checklist **cannot be edited**.

☐ **2.5.8 Target Size (Minimum) (AA)**

Checklist Submitted

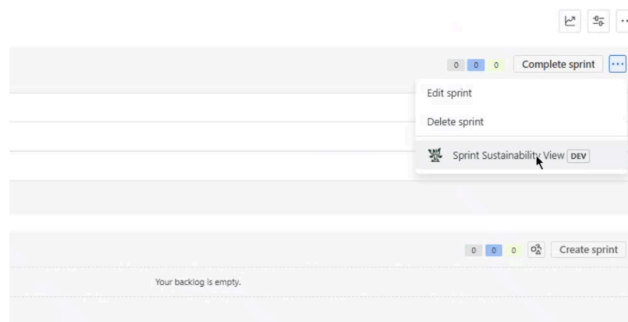

Checklist has been submitted and saved for this issue.

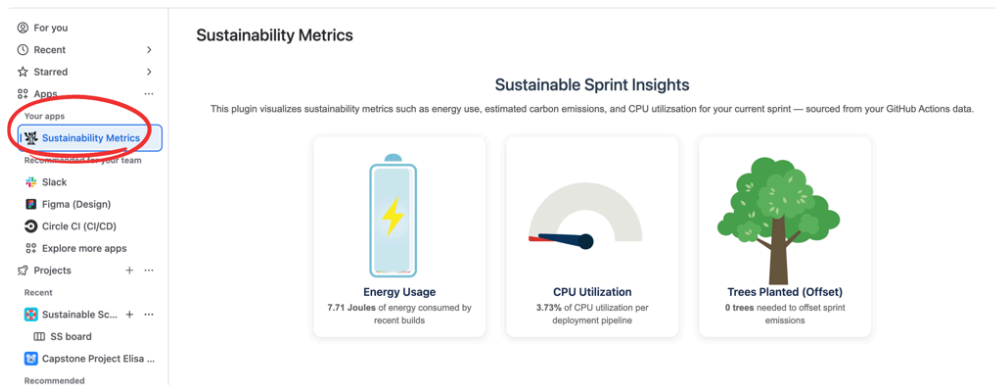

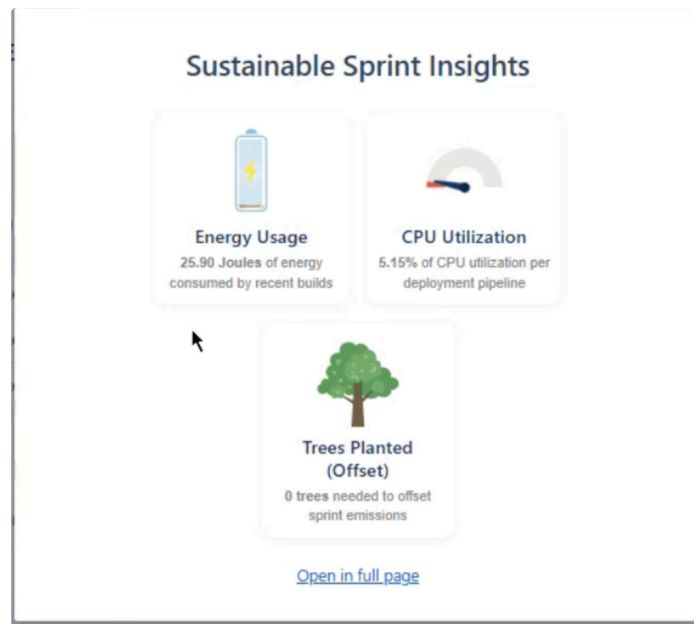

6. Complete the Sprint

- Click on the **"Sprint Sustainability View"** button.
- A **popup** will appear showing a quick summary of your sustainability metrics.
- To explore in more detail, **click "Open Full Page"**.
 - This will navigate you to the **Sustainability Metrics** page under the **"Apps"** section in the JIRA panel.

What You'll See:

- 🌱 **Energy Usage** (per deployment & total)
- ⚙️ **CPU Utilization**
- 🌳 **Number of Trees Needed to Offset Emissions**

Note: Once the insights are opened in the panel (Sustainability metrics), the panel will continue to display the **last viewed insight** opened through **Open Full Page**.

7. Confluence Report

- A **Sustainability Report** is auto-generated in Confluence once the sprint is ended.
- Contains both **team-wide** and **developer's individual** metrics.
- Includes **accessibility compliance summaries**.

Sustainability Report for Sprint "Test Sprint 19"

Jira Board: 1

Sprint ID: 314

Sprint Details

The sprint lasted from 6/8/2025, 8:04:00 PM to 6/8/2025, 8:10:12 PM. The goal of this sprint was "Plugin Demo Capstone", and the :

Aggregate Metrics

Metric	Value
Total Energy Used	25.90 Joules
Average CPU Utilisation	5.15%
Carbon Emissions	0.00 gCO ₂
Tree Offset	0.0000
Total Deployments	3.00

Individual Developer Metrics

Developer	Energy Consumed	Average Power	Average CPU Utilisation	Total Duration	Total Deployments
-----------	-----------------	---------------	-------------------------	----------------	-------------------
